PROJECTS

Online Examination System | BCA

It is a web-based application for technical evaluation. Online examination system not only replace paperwork but also releases the workload of faculty. It fulfills the requirements of the institution to conduct the exam online. Students can give exam without going to any physical destination. They can view the results at the same time. Thus the purpose of the site is to provide a system that saves the efforts and time of Faculty.

Satellite Imagery Analysis | MCA

Satellite Imagery Analysis is a multidisciplinary field that involves the examination, interpretation and extraction of information from images captured by Earth observing satellites orbiting our planet. These images provide valuable insights into various aspects of the earth's surface, atmosphere and environment. Satellite imagery analysis has a wide range of applications, including environmental monitoring, agriculture and scientific researches. The main objective of this project is to enhance how these images captured by the satellite are read, analyzed and interpreted.
